Country: Portugal

Hi! My name is Santiago and I am a software developer, I am a person passionate about technology, my areas of interest are web development, cross-platform mobile application development and video game development. I have more than three years of experience in software development. My technological stack for web development is Javascript, Typescript, React, Material UI, Next, Express, Mongo and My Sql. For cross-platform mobile application development my favorite technologies are React Native and Flutter.

EMPLOYMENT

Freelance programmer | Fiverr   *Jan 2021 - -Present*

As a freelance programmer I focused on developing web applications with the MERN stack, as well as reusable components with React and converting figma designs into pages and functional components. I also worked with React Native and Flutter applications making screens and components on the frontend side.

Software engineer | FK Tech   *Sept 2022 - Nov 2023*

I worked developing graphical interfaces with React and Next, I also worked on a mobile project using React Native. Some of the tools I used were docker, git, gitlab, aws, confluence and jira.
